# ABOUT COMPANY

Cumbia Ltd is a premier construction company with a reputation for delivering high-quality civil works, stone masonry, concrete works, and infrastructure solutions. Since our founding in 2016, we have successfully completed a wide range of projects including road construction, residential buildings, retaining walls, drainage systems, and more. Our expertise spans various sectors, ensuring that we provide cost-effective, reliable, and sustainable construction solutions for both private and public clients.

---

We pride ourselves on our ability to blend traditional craftsmanship with modern techniques, offering a wide range of services that meet the highest industry standards. Whether it's a residential building, a major road project, or specialized stone masonry, our team is equipped to handle diverse challenges with professionalism and expertise.

# OUR SERVICES

---

**Civil Works:** Full-scale civil engineering services for infrastructure development, including site preparation, earthworks, and utility installation.

**Stone Masonry:** Crafting durable, functional, and aesthetically pleasing stone structures for both architectural and landscaping applications.

**Concrete Works:** Precision concrete services for foundations, slabs, paving, and structural components ensuring long-term durability and stability.

**Elevation Walls:** Design and construction of elevation walls that enhance the visual and structural integrity of buildings.

**Road Construction:** Comprehensive roadworks, including preparation, paving, and finishing, for both urban and rural infrastructure projects.

**House Construction:** Complete residential construction services from design to final build, ensuring quality, comfort, and sustainability.

**Retaining Walls:** Expert construction of retaining walls for soil stabilization and landscape management.

**Drainage Systems:** Efficient drainage solutions to manage stormwater and prevent flooding, safeguarding property and infrastructure.

**Stone Pitching:** Specialized stone pitching for erosion control, water management, and aesthetic purposes in landscaping and infrastructure projects.
